

Errata:

Formalizing Lindenbaum-Tarski algebra for
propositional logic in Cubical Agda

Page 10, missing paragraph at the end of section **3.3.3 Structural rules**:

As a final rule we define the axiom rule that states that if a formula ϕ is present in the context Γ , then $\Gamma \vdash \phi$.

$$\frac{\phi \in \Gamma}{\Gamma \vdash \phi} \text{AXIOM}$$

Agda definition (Axiom).

```
axiom : {Γ : ctxt} {ϕ : Formula}  
  → ϕ ∈ Γ  
  → Γ ⊢ ϕ
```
